

## Exercise week 7:

1. Go to this website: [www.edc.dk](http://www.edc.dk)
2. Use Selenium to define your search criteria ( area/city, property type)
3. Use Beautiful soup to and Regex to get the following data from the search result:

Price

House size

Sales period (liggetid)

### ## Exercise 2

1. Use the extracted data to calculate the following:
  - Calculate the average sales price for the seleted area
  - Calculate the average size of the selected properties
2. Make a bar plot that shows the number of houses for sale in the three following price ranges:
  - 0 - 2.000.000
  - 2.000.001 - 5.000.000
  - < 5.000.001

Gruppe 5:

- Jonas Sthur Brøchner Nielsen (cph-jb373@cphbusiness.dk)
- Rasmus Hemmingsen ([cph-rh178@cphbusiness.dk](mailto:cph-rh178@cphbusiness.dk))
- Claes Lindholm (cph-cl303@cphbusiness.dk)
