

Exercise uge 8, gruppe 5:

Exercise 1

1. Fetch data from here: <https://www.kaggle.com/shivamb/netflix-shows> (data type is .csv)
2. Load the CSV file into a DataFrame
3. Persist the dataframe to your local docker database

Exercise 2

1. Create an endpoint that takes a year as parameter and returns all movies and series from that given year (use the column 'release_year' in the data set) (edited)
